

BIO PLANÈTE

Huilerie Moog fondée en 1984

You don't need much to make these decorative boxes.

One A4 sheet of card in the color of your choice, sharp paper scissors, perhaps a glue stick, and a craft knife.

Print out the craft pattern onto the card. Decorate all the areas which are to be cut out just the way you like it, then cut along the outer dotted lines. To make sure that the cut edges are clean, it is a good idea, depending on how thick the card is, to lightly score the corners with a craft knife. Once you have the section with the BIO PLANÈTE logo lying in front of you, fold along the grey dashes once in both directions as indicated.

Now fold the box together, fitting the sections with the numbers together so that the numbers are superposed at the edges. Start by fitting 1 to 1, 2 to 2, 3 to 3. Finish by inserting the final tab in the box.

Tip: If you want to hide the guidelines and numbers, you can also put the pattern together inside out, so that the logo, fold lines and numbers can no longer be seen. For greater stability, we recommend sticking the edges together with a glue stick—but don't forget to leave an opening if you want to use it as a little gift box.

Voilà! Your pretty packaging is ready.
